

## We are not only competent to test materials, but also for feeding!

### Online Sampler

**Did you know**, that we can serve our At-Line Stations and EXTRUSIOMETERS as well as our laboratory devices with granules, grit or powder even over wide distances without any problems? Test material is being taken out of a silo or any container and fed to the test device.

#### Here some abstracts from our transport technology:

- System suitable for granules, grit and powder
- Adjustment of the feed rate according to the application case
- Wide distances realizable by the use of sending amplifiers
- Transport medium (carrier substance) air, nitrogen, ...
- No electrostatic charging of the material
- Quick material change by sampler emptying up to the Extruder screw
- Reliable avoiding of test material bridges
- Reference material sampling
- Automatic cleaning functions (self-cleaning, ...)
- Automatic waste handling
- Sampler in Ex- or Non-Ex design

#### Some more highlights:

- Pre-filter for sticky pellets
- Furthermore manual test sample drawable
- Touch-control for up to 4 sampler (already in work)
- Sampler-control free adaptable via times
- Remote control of the PC's and the sampler via telephone, ISDN or Internet
- Automatic error diagnosis and messaging

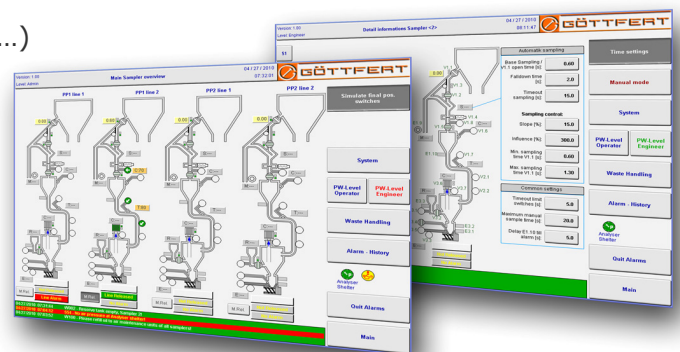

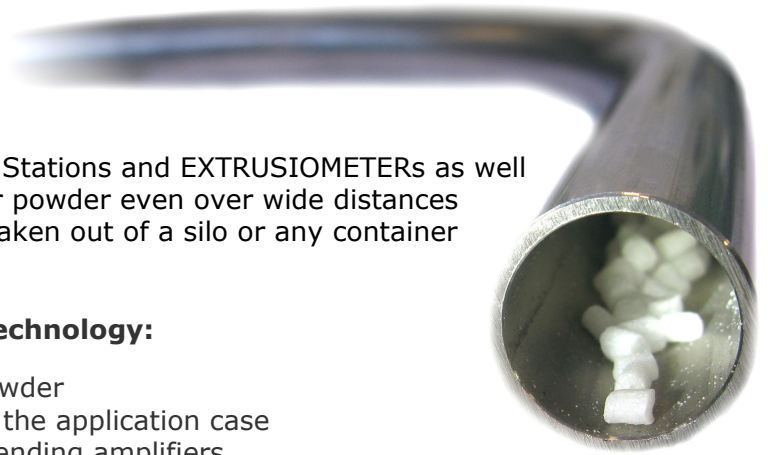

Just contact us and we send you more comprehensive information.
